

# ABOUT OUR PRODUCTS

**METAL COMPOSITE MATERIAL** BY FAIRVIEW ARCHITECTURAL

VITRABOND is a lightweight composite metal panel cladding material and boasts the widest variety of surfaces and finishes in the industry. By fusing metal skins to a composite core in a continuous coil manufacturing process, VITRABOND achieves an exceptional degree of strength and durability.

VITRABOND is well-established in the market with a long track record of consistency, reliability and cost effectiveness, and is recognized by architects, builders and installers worldwide as the superior cladding solution. With our dedicated customer support staff and our continual product development, we are readily available to meet your requirements.

## KEY BENEFITS OF VITRABOND

- Highly durable PVDF fluoropolymer Kynar 500 coating system.
- Unlimited custom colors with no MOQ (We can match any PMS, Pantone, Paint, Powder coat)\*
- Compatible with all attachment systems on the market that are designed for aluminum composite panel.
- 110% Stock & Color Policy - extra material in case you need it!
- Peel-off protective film

## TYPICAL APPLICATIONS FOR VITRABOND

- Low Rise Architectural
- High Rise Architectural
- Canopies & Awnings
- Interiors
- Refurbishment
- Curtain walls
- Transportable buildings and accommodation buildings.

**VITRABOND IS THE MOST VERSATILE COMPOSITE PANEL AVAILABLE!**

Compatible with all attachment systems and wall assemblies!

## 110% STOCK & COLOR POLICY

When the quantities, sheet sizes and color requirements for your project are received, 110% of the material required for your project (up to 2,000sf extra per color!) is reserved in our warehouse, so that the fabricator can draw on the material as needed. This material is set aside until the project is completed, which ensures color consistency for the entire project and reduces waste factor costs!

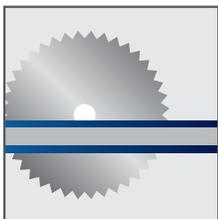

## STANDARD SHEET SIZES

- Custom Widths available from 24" to 80"
  - Available up to 10mm thick
- \*Please note:  
 • Not all colors are stocked in all sizes.  
 • For non-stock orders we can produce custom sizing. Please call Fairview to check availability.

## WORKING WITH VITRABOND

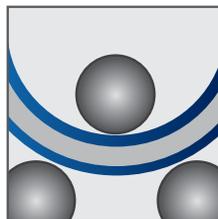

Vitrabond can be machined and shaped using extremely simple techniques and equipment.

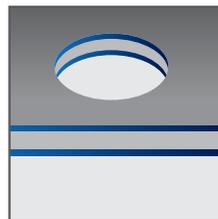

CUTTING

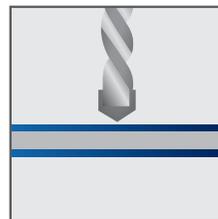

SHEARING

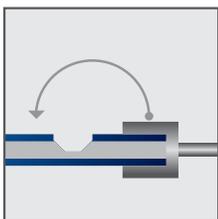

ROLL-BENDING

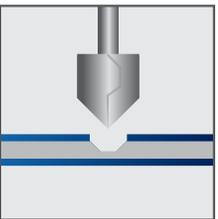

PUNCHING PERFORATING

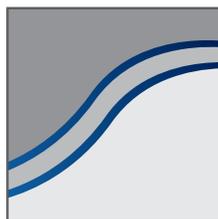

DRILLING

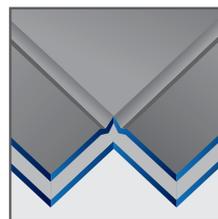

FOLDING

CNC ROUTING

PROFILING

FABRICATING

\*Non-Combustible Core (A2) conforms to BS476 Part 3 & 4 suitable for use in applications requiring non-combustible building products.

# VITRABOND COLOR RANGE

**EXPRESS RANGE**

These are the most common colors, and are maintained in inventory for quick delivery\*

\*Note: While we strive to maintain sufficient inventory for all of our clients, we cannot guarantee that all colors and sheet sizes will be available on short notice. We recommend you contact us in advance about the project so that we can ensure stock availability in the colors and sizes that you need.

## **SPECIAL ORDER**
